Education

Georgetown University

McCourt School of Public Policy, MS in Data Science for Public Policy

Washington, DC

Expected May 2028

University of Wisconsin–Madison

BS in Computer Science and Data Science

- Minors: Leadership & Digital Studies

Madison, WI

May 2025

Experience

Election Data Reporter

Decision Desk HQ

Washington, DC

Sep 2026 - Now

- Collect and verify real-time election results on election night by **web-scraping** county clerk websites, directly contacting election officials, and report public data faster than competing organizations.

Graduate Research Assistant

Better Government Lab, McCourt

Washington, DC

Sep 2026 - Now

- Developing predictive models using SNAP quality-control data, to identify cases at higher risk of payment errors and improve benefit accuracy.
- Researching the impact of federal safety-net policy changes on enrollment by analyzing government contracts, lobbying materials, and transcripts using **NLP** and data collection methods.

Software Engineer I

Starbucks

Seattle, WA

Aug 2025 - Aug 2026

- Delivered a loyalty-tier feature update across **10,000** Starbucks stores by enhancing backend plugin logic and API integrations, leading testing and rollout through multiple pilot phases.
- Improved backend reliability and modernized infrastructure by preparing services for **.NET 10 AOT**, removing outdated dependencies, enhancing scheduled jobs, validating cross-environment data replication, and delivering ongoing bug fixes to support large-scale production deployments.

Undergraduate Research AI Assistant

Information Science Lab, UW-Madison iSchool

Madison, WI

Aug 2024 - Sep 2025

- **Supporting AI fairness research** by analyzing website and survey usability to improve accessibility for auditors evaluating machine learning issues, ensuring that tools were accounted for diverse user needs.
- Created automated audit report templates in **RMarkdown** to visualize theme frequency and support equity-focused insights in public ML system audits.

Software Engineer Intern

Starbucks

Seattle, WA

June 2024 - Aug 2024

- Developed an **automation tool** to enhance the efficiency of updating test cases in TestRail, reducing duplication by **50%** for Quality Engineers and improving app quality for users.

Information Technology Intern

Loop Capital

Chicago, IL

June 2022 - Aug 2022

Machine Learning Intern

Balyasny Asset Management

Chicago, IL

June 2021 - Aug 2021

Projects

Fairness Audit Classifier, UW-Madison iSchool

[GitHub Lab](#) 

- Developed and evaluated multilabel classifiers (**Logistic Regression**, **TF-IDF + SVM**) to detect fairness concerns in responses; LR outperformed others on key labels such as 'Underrepresented Group'.
- **Tools Used:** R, text2vec, caret, tidyverse, LiblineaR, reticulate, Python

ESG Analysis Tool

[Github Repo](#) 

- Developed an interactive **Shiny dashboard** for ESG investors to visualize corporate sustainability performance, allowing users to filter companies by ESG sector, rating levels (AAA-C) and score distributions.
- **Tools Used:** R, Plotly, ggplot2, DT, dplyr

Skills

Programming Languages: Python, R, SQL, C#, Go, Java, JavaScript, Kotlin, React, Typescript

Technologies: Linux, GitHub, RStudio, Visual Studio, Android Studio, Azure, Splunk, Tableau
